

Joint Closure for Multi Ducts

Duct branch closure for Micronet™ multi-ducts

This branching and jointing kit is intended for branching of Micronet™ multi-ducts and micro-ducts. The closure can also be used as a protective cover for straight joints. The kit includes a number of adapters and plugs to fit all types of Micronet™ direct burial ducts and to enable virtually any type of duct branch and duct joint combinations.

The closure consists of a HDPE plastic cast divided in two halves, forming a re-entable mechanical protection around the duct connectors.

The closure has 4 duct ports (two ports on each side of closure), each port with an internal diameter of 40 mm suitable for 7-way multi-ducts.

The kit includes port reducers to reduce port diameter from 40 mm to 32 mm for the installation of 4-way multi-ducts. For the installation of 2 x 16 mm micro-ducts, two split-reducers are included. For non-used ports, a plug with a diameter of 40 mm and two 16 mm plugs are supplied.

Included duct adapters:

Qty	Size	Description	Used for
4	40 mm	Std. grab ring	7-way multi duct, DB
2	40 ≥ 32 mm	Port reducer	4-way multi duct, db
2	40 - 2x16 mm	2 single branch adapter	2 x 1-way micro duct, DB
1	40 mm	Port plug	Plugging unused entrance
2	16 mm	Port plug	Plugging unused entrance

Size and weight:

The overall size of the black housing is 352 x 181 x 85 mm and weight 1 Kg.
